Educators and Career Practitioners

Time to Choose...a Post-Secondary Education Program will help your students or clients choose between full-time or part-time studies, evaluate various programs and assess the institutions that offer them. This publication offers application and contact information for all post-secondary institutions funded by or offering degree programs approved by the Government of Alberta. A resources section at the back of the publication is organized by topic, providing an at-a-glance reference to other sources of help.

WHICH PROGRAM IS RIGHT FOR ME?

You may be feeling that you're facing huge changes right now. You are. Life is about change.

Pipefitter or police officer? Translator or technician? Social worker or sales manager? Alberta post-secondary schools offer programs that will give you the foundation for these and hundreds of other jobs.

All you have to do is choose a program.

Choosing can be a bit scary. You're about to step into the unknown and commit a good deal of time, energy and money to your future. *Time to Choose* can help you make choices that are the best fit for you.

People take post-secondary education for a variety of reasons. This publication will give you some tips to help you figure out what your reasons are. Understanding why you want to continue your education is just the start of an exciting future that is yours to create.

Your career will probably take several different paths, so this is not a one-time decision. To get you started, just think about where you see yourself in 10 years. This will help you decide what you want from a post-secondary program now.

What do I really want?

You might already have a program or path in mind. Or you may be figuring out what you want to do with the next phase of your life. Either way, it's a good idea to make sure the reason you want to attend a post-secondary program meshes with who you are. To find a program that's the best fit for you, look for one that reflects your values and interests. Want some help figuring out what these are? Use any of the following free tools to learn about yourself.

1 Check out ***This is Your Life*** at **alis.alberta.ca/thisisyourlife** for a guide filled with quizzes, questions and ideas to help you work out what kind of education and job works best for you. Or ask your counsellor to order a copy for you.

2 Go to **careerinsite.alberta.ca** and click on Know Yourself for short but in-depth exercises and quizzes about

- interests
- abilities
- work values
- preferred working conditions
- vision
- significant experiences
- multiple intelligences

3 For help with making choices that suit what you want from your future, download *My Choices, My Work, My Life* at **alis.alberta.ca/mychoices**, or ask a counsellor to order it for you.

© Government of Alberta

4 For a quick introduction to career planning, download *Going Somewhere? Live/Learn/Work* at **alis.alberta.ca/goingsomewhere**. Discover your interests, passions, skills and strengths so you can begin to plan your life, learning and work. You can also ask a counsellor to order it for you.

What's out there?

As you think about your interests, values and skills, patterns will emerge that point to specific subjects and occupations. If any of these occupations appeal to you, dig a little deeper. Ask yourself the following questions:

- ***How are other students finding their best fit?***
  See **alis.alberta.ca/educationvideos** to see how others like you combine their interests with their education.
- ***What does the occupation look like?***
  See **alis.alberta.ca/occvideo** for videos about different jobs.
- ***What's the occupation all about?***
  See **alis.alberta.ca/occinfo** for details about more than 550 occupations.
- ***How much can I earn at this job to support the lifestyle I want?***
  See **alis.alberta.ca/occinfo** for salaries of more than 400 occupations.

How can I find out more?

Information about careers isn't limited to the Internet. You can also discover facts and opinions about work you're interested in by approaching

- people with jobs that might appeal to you
- volunteer organizations where you can try out a job
- organizations that represent specific professions you want to know more about
- businesses where you can job shadow
- career resource centres in junior and senior high schools or post-secondary institutions
- public and academic libraries (ask the librarian for help finding career planning materials)
- the Alberta Career Information Hotline (780-422-4266 in Edmonton or 1-800-661-3753 toll-free)
- Alberta Works Centres (see page 62 of the Resources section)

Start with ALIS!

Alberta Learning Information Service (ALIS) has all kinds of education and career information for you. Go to **alis.alberta.ca** for information about planning for your education.

© Government of Alberta

Is this the right fit for me?

Once you've narrowed down the path you're interested in, it's just a matter of finding what programs can help you move toward your goal. Ask yourself these best-fit questions before you make a final decision:

1 Why am I suited for or interested in this program of study?

2 How do I learn best?

3 Which institution can give me what I need for my studies and future goals?

4 Where do I see myself after finishing the program and five years after that?

In the following chapters, *Time to Choose* will help you decide how and where you want to pursue your studies. You may want to keep your options open and apply for several programs, or at a few schools, just in case one program or school can't take you. It's up to you to create choices for yourself. And it's up to you to decide.

© Government of Alberta

FULL TIME, PART TIME, ONLINE OR ON THE JOB?

The pathway you choose for learning will depend on your circumstances and interests. If you have the time and resources, full-time studies may be right for you. If you have other passions or commitments, part-time study, distance learning or on-the-job training may suit you better.

Part-time study and distance education

Part-time study

Once you finish high school, the possibilities for your future are endless. You may wish to volunteer, travel, work or devote more time to family responsibilities. Balancing your new life with just a few post-secondary courses makes sense. Studying part time is also a good way to try out a program before you commit full time.

Online or distance education

Distance education may be an option if you want to work while studying, need to care for someone at home or prefer self-directed learning. Most or all of this learning occurs outside a formal classroom, so you can fit your learning into your life. Programs and courses are offered online and sometimes by correspondence. In many cases, you may never meet your teachers face to face. Once registered, you may have access to post-secondary institution libraries in your area.

If you plan to change institutions or programs down the road, check out transfer opportunities before you begin. You can do this by searching the online TransferAlberta guide at **transferalberta.ca** or check the Transfer Alberta app, available for iPhone or Android devices. You can also call the Alberta Council on Admissions and Transfer at 780-422-9021 in Edmonton or 310-0000 toll-free in Alberta, and enter the above 10-digit telephone number for more information on transferring post-secondary courses and programs.

Visit **alis.alberta.ca/occinfo** for more information about distance learning programs in Western Canada. Students in Alberta have a number of different options. Most provincial post-secondary institutions provide some distance or online courses and programs, while Athabasca University (**athabascau.ca**) only provides distance or online programs. For a partial list of institutions offering online courses, visit eCampusAlberta at **ecampusalberta.ca**.

© Government of Alberta

Work experience, apprenticeship and on-the-job training

Many post-secondary institutions give students the opportunity to learn both in the classroom and on the job by

- offering programs that include work experience components, such as clinical placements, practicums, residencies and internships
- offering co-operative education programs that alternate periods of classroom instruction with periods of paid on-the-job training or work experience
- participating in designated apprenticeship or occupational training programs administered by Alberta Apprenticeship and Industry Training

If you prefer hands-on learning, you might want to explore on-the-job training and apprenticeships. Keep in mind that these options are only available in some trades and occupations.

For example, learning on the job is not an option for dentists and dental hygienists, but it is a possibility for dental assistants. Continuing education courses prepare students for certification and provincial registration as registered dental assistants. As well, some post-secondary institutions offer dental assistant training programs.

Likewise, people who want to become hotel managers may

- start in an entry-level position in the hospitality industry and work their way up to more advanced positions by taking related continuing education courses
- enrol in a related post-secondary program and gain experience in the hospitality industry, either during their studies or after they graduate from the program

Co-operative education programs combine study with work experience in fields such as business, engineering, government, industry and social services.

© Government of Alberta

Trade apprenticeships and occupational training

If you are interested in a career in a designated trade or occupation, you can earn a salary while learning the on-the-job skills necessary to receive a recognized journeyman or occupational certificate. In Alberta, there are currently 49 apprenticeship trades and 12 designated occupations. Job skills and competencies, as well as performance standards and training programs, are defined by industry and approved under the *Apprenticeship and Industry Training Act* and the *Designation of Occupations Regulation.*

Training in the trades

Apprenticeship programs combine on-the-job training with technical training delivered in a classroom by an approved training provider. To learn the skills and competencies of an Alberta designated trade, you must first locate a qualified Alberta employer willing to hire and train you. You can register as an apprentice online by visiting **tradesecrets.alberta.ca**. Apprenticeship training programs generally last two to four years, depending on the trade.

Occupational training programs

Occupational training programs consist of work experience or formal training, or a combination of both. You first master the necessary skills and competencies required and then apply to have those skills and competencies assessed for certification. Two of the 12 designated occupations—construction craft labourer and gas utility operator—also offer training programs. Occupational training programs generally last from one to two years, depending on the occupation.

For more information about how to become a registered apprentice or an occupational trainee

- visit the Alberta Apprenticeship and Industry Training website at **tradesecrets.alberta.ca** or call 1-800-248-4823
- call the Alberta Career Information Hotline at 780-422-4266 in Edmonton or 1-800-661-3753 toll-free

© Government of Alberta

WHAT POST-SECONDARY PROGRAMS ARE OFFERED AND WHERE?

Certificate, diploma, applied degree, bachelor's degree...what's the difference?

	Certificate	Diploma
Definition	• prepares students for entry into specific occupations	• prepares students for entry into a particular field or group of occupations • gives students a chance to continue into degree programs if/when they choose to do so
Entrance Requirements	• high school graduation, often with specified minimum grades and subjects *Exceptions:* • *Trades prefer high school graduation with trade-specific courses or successful completion of an apprenticeship entrance exam.* • *University-level certificate programs may require a higher level of education for admission, such as a bachelor's degree or, in some cases, a master's degree or doctorate.*	• high school graduation, with specified grades and subjects *Exceptions:* • *Older applicants may be eligible for mature student admission.* • *University-level diploma programs require one or more years of academic study or equivalent beyond a bachelor's, master's or doctoral degree. Diploma courses may be applicable to related graduate degree programs.*
Length	• one year or less of full-time study at a college, polytechnic institute or university *Exception:* • *Alberta Journeyman Certificates average two to four years.*	• two years of full-time, applied study at a college or polytechnic institute
Transfer Options Consult the online TransferAlberta guide at **transferalberta.ca** for specific information.	A certificate may earn you transfer credit and admission into a diploma program.	If considering a diploma that transfers to a degree program, you must also meet the entrance requirements of the degree program.

© Government of Alberta

Note: Some post-secondary institutions offer preparation for university or college programs to help students upgrade, or to take courses needed to meet admission requirements. Check with the school you are interested in to find out more.

Applied Degree	Bachelor's Degree	
• combines theory with practical application • provides career preparation at the undergraduate level for industry employment opportunities beyond entry level *Examples:* • *Bachelor of Applied Science–Conservation Enforcement* • *Bachelor of Applied Business Administration*	• provides knowledge and skills in a discipline or disciplines • prepares graduates for employment and/or further study.	**Definition**
• high school graduation, with specified grades and subjects *Exception:* • *Completion of a related diploma program may be a prerequisite for admission to the third year of an applied degree program.*	• usually a minimum grade and/or average in five specific Grade 12 subjects, including English 30-1 • may require higher grades than the specified minimum in faculties with enrolment limits or quotas *Exception:* • *Athabasca University has an open admissions policy (few or no specific entrance requirements) for students 16 years of age and older.*	**Entrance Requirements**
• four-year programs at some universities, colleges and polytechnic institutes, consisting of six semesters (about three years) of academic studies and at least two semesters (about one year) of related work experience	• three to four years of full-time study at a post-secondary institution, depending on the level of degree earned	**Length**
Students graduating from an applied degree program may not be able to apply directly to graduate studies. However, often students may be admitted after completing qualifying courses.	A bachelor's degree is typically required for admission to graduate studies such as master's and doctoral programs.	**Transfer Options** **Consult the online TransferAlberta guide at transferalberta.ca for specific information.**

Note: You'll find certificate, diploma and degree programs in the Programs Chart beginning on page 20.

© Government of Alberta

Collaborative programs

Collaborative degrees are jointly delivered by two institutions on one site, allowing students to study at one campus. The host college or institution delivers university-transferable first- and second-year courses. The collaborating, degree-granting institution offers the courses to complete the degree at the host college. For example, students can complete the University of Alberta's bachelor of science in nursing at Red Deer College or bachelor of education (elementary) at Grande Prairie Regional College.

The Programs Chart beginning on page 20 identifies collaborative programs with a number sign (#).

Advanced degree programs

The information provided here is limited to degree programs within the Campus Alberta system that are approved by the Government of Alberta.

Professional undergraduate degree programs

A professional undergraduate degree program builds skills and knowledge for professional practice in specific fields. Examples include law, medicine and dentistry. These programs generally require an undergraduate degree for admission but may accept qualified students who have completed two or three years of undergraduate studies.

The Programs Chart beginning on page 20 identifies professional undergraduate degree programs with the abbreviation **DDS**, **LLB/LLM** or **MD**.

Master's degree programs

A master's degree program builds on an undergraduate or bachelor's degree.

Applicants who have a three-year undergraduate degree usually need to complete an additional qualifying year. Those with an applied degree may require extra coursework to be accepted.

The Programs Chart beginning on page 20 identifies master's degree programs with the abbreviation **M**.

Doctoral degree programs

A doctoral degree program typically builds on previous study, usually at the master's level.

Doctoral programs leading to a doctor of philosophy (PhD) degree are research based. Professional doctoral programs, such as doctor of education (EdD) and doctor of music (D.Mus.), provide instruction in research methods but are designed to prepare students for work in a specialized field.

The Programs Chart beginning on page 20 identifies doctoral degree programs with the abbreviation **PhD**.

© Government of Alberta

Apprenticeship certificate programs

Alberta Journeyman Certificate Program

- Training is available in 49 Alberta-designated trades.
- Registered apprentices must complete a specific number of hours and months of on-the-job training during each training period. They must also take technical training delivered by an approved provider, followed by mandatory examinations.
- Certified journeypersons and completing apprentices may choose to write an Interprovincial Standards Red Seal exam in participating trades. Acquiring a Red Seal Endorsement is a great career investment as it allows the holder to work in other Canadian provinces and territories without additional training or examination.

For more information, visit the Alberta Apprenticeship and Industry Training website at **tradesecrets.alberta.ca**. Click on Learn on the Job, then Who Can Learn a Trade?

The Programs Chart beginning on page 20 identifies journeyman certificate programs with the abbreviation **J**.

Alberta Occupational Certificate Program

- There are 12 designated occupations in Alberta.
- An occupational certificate provides recognition of achieved standards of competency in a designated occupation. Designated occupations do not require a certificate or participation in a training program to work in and learn the occupation.
- Designated occupations have varied requirements for certification based on industry standards. Certification is largely competency based, meaning that an applicant's skills are assessed for certification. Two designated occupations include industry training programs, while only one (Construction Craft Labourer) is part of the Red Seal program.
- An occupational certificate may be earned on the job or through employer-provided formal training.

For more information, visit the Alberta Apprenticeship and Industry Training website at **tradesecrets.alberta.ca**.

The Programs Chart beginning on page 20 identifies occupational certificate programs with the abbreviation **O**.

© Government of Alberta

Programs at private institutions

These institutions are often referred to as Private Career Colleges.

Private vocational training programs

- Approximately 150 private training providers offer over 800 vocational programs licensed under the *Private Vocational Training Act* and *Private Vocational Training Regulation*.
- Students are prepared for employment in a variety of occupations.
- Before enrolling in a vocational training program, contact potential employers in the area in which you are seeking employment. Ask potential employers if they would hire graduates of the program you are planning to take.
- These programs train people in specific occupations, such as information technology, hairstyling, health care and truck driving. Programs vary in length from institution to institution and may be full time or part time.
- If a profession or occupation is regulated by a professional body, contact that body to ensure that the program is recognized for employment in Alberta.

For more information, visit the Alberta Advanced Education website at **advancededucation.alberta.ca/post-secondary/institutions/private**.

To search for specific programs, go to **alis.alberta.ca/occinfo**.

Theological institutions

- Theological education at a divinity school or seminary prepares students for ministry or other faith-based service.
- Theology degrees, certificates or diplomas are not regulated or approved by the provincial government but may be endorsed by faith-based accreditation organizations such as the Association of Biblical Higher Education or the Association of Theological Schools.
- Divinity or theology programs in Alberta are offered by private theology schools and through seminaries at some independent academic institutions.

To search for theology or seminary programs, go to **alis.alberta.ca/occinfo**.

Alberta Dual Credit

Alberta's innovative dual credit strategy allows students to earn credits from high school and post-secondary institutions at the same time and creates opportunities for preferred placement (post-secondary course exemption) and workplace certification.

Information on the Provincial Dual Credit Strategy can be found at **albertadualcredit.ca**.

© Government of Alberta

Transfer programs and agreements

Transfer programs and agreements give students the flexibility to begin their studies at one institution and later transfer to another institution or program. The benefits of a transfer program may include the ability to begin your studies in your community, the opportunity to choose from a greater number of institutions and potentially smaller class sizes and lower tuition fees.

What do I need to know about transferring credits?

Here are some things to keep in mind if you are planning on beginning your studies at one post-secondary institution and transferring to another:

- Get advice and written documentation about your program requirements from both institutions to make sure you understand the credit you may receive for your courses.
- Be aware that program admission is competitive and the number of students who can be admitted may be limited. Admission is not guaranteed after completing a transfer program.
- Confirm with the institution the number of courses or credits you can transfer. Be aware that there may be a limit to the number of courses you can receive transfer credit for.
- Use the online TransferAlberta search tools to plan your transfer path.

Transfer Alberta

Transfer Alberta is the official source of transfer information in Alberta. It lists more than 80,000 transfer agreements by program and by course between post-secondary institutions in Alberta, British Columbia, the Northwest Territories, Nunavut and the Yukon. The website (**transferalberta.ca**) also provides access to information about admissions, Prior Learning Assessment and Recognition (PLAR), dual credit, academic upgrading and the acceptability of Grade 12 courses from other provinces for admission. Transfer and other pathways agreements and information can change, so check the website and mobile app often. For more information check out the poster at **alis.alberta.ca/transfer-alberta-poster**.

If you plan to attend post-secondary or transfer to another institution, speak with advisors at your first/current institution as well as at your destination institution. This may help avoid any misunderstanding about what transfer or other credit may be awarded.

For more information, contact

Alberta Council on Admissions and Transfer
Phone: 780-422-9021 in Edmonton or 310-0000 toll-free, and enter the 10-digit telephone number. Callers who are deaf or hard of hearing with TDD/TTY units can call 780-427-9999 or 1-800-232-7215 toll-free.
Fax: 780-422-3688
Email: acat@gov.ab.ca

How to transfer credit

By program

- Take up to the first two years of a university transfer program through college or eCampusAlberta courses and transfer to another institution for the final portion of a degree program.
- Complete a one-year certificate program at one post-secondary institution and transfer to another institution to complete the second year of a diploma program.
- Complete a two-year diploma program at one post-secondary institution and transfer to a degree-granting institution to complete the final two or more years of a degree.

By course

- Transfer an individual course to another institution for credit.

A transfer agreement is an agreement between two institutions indicating how one institution's course or program will be accepted for credit at the other institution.

Transfer Alberta Mobile App

The Transfer Alberta Mobile App is available through the Apple App Store or the Google Play Store.

- You can search for course or program transfer credit between post-secondary institutions.
- You can find high school upgrading and high school out-of-province course information for post-secondary admission.
- You can save your searches for future post-secondary planning.

© Government of Alberta

Study and work abroad programs

Many of Alberta's post-secondary institutions offer exciting opportunities to work, volunteer or take courses in another country. Studying and working abroad can encourage creativity, global thinking and new perspectives. If you're interested in travelling as a part of your education, consider the following:

- international internships
- research opportunities
- student mobility and exchange programs
- study abroad programs
- summer study tours
- work and volunteer placements

Studying abroad while you are registered at a provincial post-secondary school has many benefits. For instance, by traveling with a summer study tour, you can earn credits towards your program. If you want to study abroad for a semester, you can pay your tuition fees in Alberta and easily transfer your international credits from a partner institution to your home school. By researching, working or volunteering internationally, you can build your resumé, learn a new language, grow your professional skills and expand your network, often in ways not possible in Alberta. Some of these opportunities are only available to you while you are in post-secondary, so take advantage. To be considered for some opportunities, you must be a full-time student in good academic standing.

Studying or working internationally will mean extra costs. Aside from the cost of books, accommodations, meals and personal expenses every student must pay, you'll also need to budget for any extra fees charged by the host institution, travel costs or mandatory medical insurance. Scholarships and financial aid may be available for some opportunities through your university or college and the Government of Alberta to make these experiences more affordable.

Check with the international or study abroad office of your post-secondary institution for more information on international opportunities or visit the Alberta Advanced Education site at **advancededucation.alberta.ca/studyabroad**.

© Government of Alberta

Study abroad on your own

You don't need to be enrolled as a student in Alberta to go to a school outside of Canada. But if you plan to study at a school that isn't an exchange partner with an Alberta post-secondary institution, your credentials may not be recognized in Alberta. This might prevent you from working in your occupation after you return. Before you buy your plane ticket, make sure of a few things:

- Will the school you're interested in accept your existing Alberta high school or post-secondary credits?
- Will the credits you earn abroad be recognized by Alberta schools if you can't complete your studies outside the country and need to transfer your credits?
- Will the certificate or degree you receive from a foreign school be recognized in Alberta?
- If you need to do a Canadian internship or residency for your program, will you be able to apply? In many occupations, Albertans who study outside Canada may not be eligible for Alberta internships or residencies.
- If you're studying to enter a regulated occupation in Alberta, will the credential from the foreign school meet the licensing requirements here in Alberta? Check with that occupation's professional regulatory organization.
- Are you studying to enter an occupation that is not regulated? Talk to potential Alberta employers to see whether they would hire someone with the foreign credentials you're planning to achieve.

It's up to you to make sure your foreign credentials will be recognized in Alberta.

© Government of Alberta

First Nations college programs

First Nations colleges in Alberta provide an educational experience while fostering First Nations culture and traditions. These colleges deliver a range of learning opportunities, including adult upgrading, preparatory programs, Indigenous languages and culture programs, and certificate, diploma and degree programs. In addition, the colleges provide services that meet the needs of their students and communities.

Search alis.alberta.ca/occinfo for detailed descriptions of Alberta programs and schools.

Using the Programs Chart

Use the Alberta post-secondary education Programs Chart beginning on page 20 to find out

- which publicly funded institutions offer programs of interest to you
- how long it takes to complete each program if you attend full time
- what type of credential you earn when you graduate from the program (for more information, see the What Post-Secondary Programs Are Offered and Where? section on page 8)

Note: The Programs Chart includes only those institutions within the Campus Alberta system funded by or offering degree programs approved by the Government of Alberta.

How to read the chart legend

The legend at the top left corner of the Programs Chart shows

- **what type of program is offered:** For example, an applied degree is an **A** in the chart, while an apprenticeship trade is marked * and a certificate is a **C**.
- **how long the program is:** In the legend, you'll find different codes that provide insight about how long it will take to complete a given program. For example:
  - **y** indicates the number of years. You might see **B3y**, which suggests that this Bachelor's degree takes three years to complete.
  - **V** indicates the duration of the program varies. In these cases, you'll want to check with the post-secondary institution to find out more.
  - **C** indicates that this certificate takes one year or less to complete as per the legend.

Some programs have application dates that are much earlier than you might expect (see application dates beginning on page 47 or contact the institution for details).

How to read the chart

Post-secondary programs are grouped into broad subject categories such as

- Computer and Information Technology
- Health Care and Related Studies
- Sciences
- Trades and Industrial Training

Look through the categories on page 17 to see which one would likely include the program you're interested in. For example, a program in genetics will be found in the Sciences category, while a program in software and Internet development will be found in the Computer and Information Technology category.

© Government of Alberta

Questions to ask

- What are the entrance requirements?
- What are the application deadlines for the program?
- Is it a quota program with limited enrolment? If so, what grades are generally required to gain admission?
- Does the program start in September or are there other possible entry dates?
- Does the program include a work experience component? If so, is it volunteer work or are students paid for their work? Who is responsible for arranging the work experience?
- How much do tuition, books and supplies cost?
- Does the program offer the option of transferring to another institution or program to complete the credential or pursue a higher one?
- What percentage of graduates find related employment?

Where to find more information about specific programs

- Contact the post-secondary institution directly. Visit or call the school, or go to the website. For contact information, see the Which Post-Secondary Institution Should I Attend? section beginning on page 44.
- Go to **alis.alberta.ca/occinfo** for post-secondary program information, including admission requirements.
- Browse resources in career counselling offices and libraries in your area.
- Visit Alberta Works Centres located throughout the province (for contact information, see page 62 in Resources). These centres provide career planning information, including academic calendars that contain details about programs and courses.

After you've gathered some basic information about the program(s) you're interested in, it's a good idea to talk to people who are knowledgeable about the program, including

- program advisors at the institution
- representatives of professional associations or licensing bodies
- employers likely to hire program graduates
- program graduates

Finding and contacting these people may take some networking, but it's well worth the effort. For example, if employers tell you that they prefer to hire graduates of a different type of program, that's definitely something you want to know *before* you enrol.

COMPUTER AND INFORMATION TECHNOLOGY (cont'd)

Information Technology Management: Business Analyst Leadership; Business Intelligence; Cloud Computing Essentials; Information Assurance; Information Design; Information Systems; Security; Software Testing; Technology Infrastructure Analyst — C, B, #3y, PD, M

Network Administration and Technology: CCNA; Cloud Computing Essentials; CompTIA; Core Networking; .NET Development; Network Administrator; Network Infrastructure Analyst; PC Service & Support; System Security; Windows Server

Web and Multimedia Design and Development (Programming): Android Developer; Animation; Apple iPhone/Pad Developer; Application Development; Computational Media Design; CSS/HTML Core; Digital Media & IT; Front-End Development; Game Development; Graphic Design; Interactive Digital Design; Java Developer; Media Arts & Digital Technologies; Multimedia Production; Pop Art; Software Development; Visual Design; Web Applications; Web Design; WordPress. *See also Engineering and Science Technologies, pages 28-29* — D, B — C

DRIVER TRAINING

Driver Training: Air Brake (Q) Endorsement; Class 1 (Tractor/Trailer Truck); Class 2 (Bus); Class 3 (Single Unit 3-Axle Truck); Instructor; Truck Transport (Class 1)

EDUCATION AND LIBRARY STUDIES

Adult Education and Workplace Learning: Adult & Continuing Education; Adult Educator; Adult Learning; Becoming a Master Instructor; Curriculum Development & Instructional Design; Train the Trainer; Workplace Learning

Distance Learning and Technology: Distance Education; Distance Education Technology; eLearning; Instructional Design; Technology-Based Learning — PD, M, EdD

Education, K–12: Aboriginal Teacher Education Program (ATEP); Bachelor of Education, Bachelor of Education After Degree, & Combined Degrees, in Elementary & Secondary Education, with many specializations, such as Business, History, Math, Music, Native Studies, Physical Education & Sciences; Teacher Education North (TEN) — #B

Education, K–12, Graduate Programs: Distance Education; Educational Leadership; Educational Policy; Educational Psychology; Educational Research; Inclusive Education; Policy Studies — D, PD, M, EdD

Educational Assistant: Inclusive Education; Special Needs Educational Assistant; Teacher Assistant — D — C

Library and Information Studies: Humanities Computing; Library & Information Technology; Library Operations

Teaching English as a Second Language: Teaching English as a Second Language (TESOL); Teaching International & Heritage Languages

ENGINEERING, ARCHITECTURE AND RELATED STUDIES

Architecture and Related Studies: Architectural Technology; Building Development; Environmental Design; Landscape Architecture; Landscape Gardener*; Revit Architecture Essentials; Urban & Regional Studies; Urban Studies — J4y — B, PD

Computer-Aided Drafting and Design (CAD/CADD): AutoCAD; AutoDesk Inventor; CADD Operator; CADD–Technical Illustrator; GIS & CADD Integration; MicroStation CADD; Municipal Drafting; Piping Drafting & Design; Process Piping; Process Systems; Steel Detailer** (3 Levels). *See also Computer and Information Technology, pages 24-27* — OV — C

Engineering: specializations in Agricultural; Architectural Technology; Biomedical; Chemical; Civil; Computer; Electrical; Electronics; Energy; Environmental; Materials; Mining; Oil & Gas; Petroleum; Power

HEALTH CARE AND RELATED STUDIES

Dental and Denturist Technology: Dental Assisting; Dental Hygiene; Dental Laboratory Technology; Denturist Technology; Pre-Dental Hygiene					
Dentistry and Orthodontics: Pre-Dentistry					
Emergency Medical Services Technology: Ambulance (EMT-A); Emergency Communication & Response; Emergency Management; Emergency Medical Responder (EMR); Emergency Medical Technician (EMT); Emergency Medical Technologist; Fire; Paramedic (EMT-P). *See also Social, Community and Protective Services, pages 36-39*					
Hearing Aid Practitioner					
Holistic Health: Acupuncture; Chiropractic Medicine; Feng Shui; Integrative Health Coach; Reiki; Yoga Therapy					
Massage Therapy					
Medical Laboratory Assistant and Medical Laboratory Technology: Cytotechnology; Laboratory & X-Ray Technician					
Medicine and Specializations: Anesthesia; Biomedical Engineering; Cardiovascular; Emergency Medicine; Family Practice; Gastrointestinal Sciences; Health Studies; Immunology; Medical Research; Midwifery; Pain Management; Psychiatry; Surgical Specialties					
Nurse, Practical (LPN): Aboriginal Practical Nurse; Internationally Educated Nurses; LPN Refresher. *See also Health Care Aide, pages 38-39*			#B		D, Dt
Nurse, Registered (RN): Bridge to Canadian Nursing; Nursing After Degree; Nursing Degree; Nursing Post-LPN			#B		
Nursing Post RN and Nursing Specialties: Bachelor of Nursing; Cardiac; Critical Care; Emergency; Gerontology; Master of Nursing; Neonatal; Neuroscience; Nurse Practitioner; Occupational Health; Orthopaedics; Palliative Care; Perinatal; Perioperative; Psychiatric; Sexual Assault Nurse Examiner; Wound Management			#B, PD, M		
Occupational and Environmental Health and Safety: Industrial Emergency Management. *See also Health Administration, pages 22-23*					
Optometry and Ophthalmic Dispensing (Glasses & Contact Lenses): Automated Refracting Theory; Pre-Optometry					
Pharmacology, Pharmacy and Pharmacy Technician: Pre-Pharmacy					Dt

SOCIAL, COMMUNITY AND PROTECTIVE SERVICES (cont'd)

Disability Studies: Community Rehabilitation; Deaf & Blind Support Services; Dementia Care; Disability & Community Studies; Disability Management in the Workplace; Educational Transliterator; Fetal Alcohol Spectrum Disorder Education; Special Needs Educational Assistant; Stroke Rehabilitation — C, Dt

Early Learning and Child Care: Children's Mental Health; Day Home Provider; Early Childhood Development; Early Childhood Education — C, Dt

Fire Services and Emergency Management: Emergency Services Technology–Fire; Fire Fighter; Fire Fighter (NFPA Standard 1001); Industrial Emergency Management. *See also Emergency Medical Services Technology, pages 30-31*

Health Care Aide: *See also Nurse, Practical (LPN), pages 30-31* — C

Interpreter Services: American Sign Language & Deaf Culture Studies

Police, Criminal Justice and Corrections: Commercial Vehicle Enforcement; Community Justice; Correctional Services; Criminology; Justice Studies; Law Enforcement; Management; Police & Investigations; Police Studies; Pre-Professional Criminology; Private Investigation; Security Management; Youth Justice — B, C, Dt

Social Work and Community Social Work: Pre-Professional — D

TRADES AND INDUSTRIAL TRAINING

Pre-Trades: Apprenticeship Prep; Bridge to Transit Operators; Co-operative Trades Orientation; Mechanical & Construction Trades Preparation; Pre-Employment; Trades Readiness; Workplace Hazardous Materials Information System (WHMIS)

Building Operations: Building Maintenance Worker; Maintenance Management — C

Parts Technician* and Parts Technician–Materials Technician*: Pre-Employment Partsman — 13y

Safety Training, First Aid and Transportation Safety

Construction Trades

Carpentry: Cabinetmaker*; Carpenter*; Millwork & Carpentry; Pre-Employment; Woodworking — 14y

Construction: Bricklayer*; Concrete Finisher*; Construction Craft Labourer**; Construction Management; Elevator Constructor*; Floorcovering Installer*; Glazier*; Industrial Construction Crew Supervisor**; Insulator*; Lather–Interior Systems Mechanic*; Painter & Decorator*; Pre-Employment; Residential Construction Site Manager**; Roofer*; Sheet Metal Worker*; Steel Detailer** (3 Levels); Tilesetter* — 12y, 13y, 14y, OV, O1y, O2y, O3y

Heavy Equipment Operator: Crane & Hoisting Equipment Operator* (CHEO–Boom Truck*, CHEO–Mobile Crane*, CHEO–Tower Crane*, CHEO–Wellhead Boom Truck*); Front End Loader; Haul Truck Operator; Heavy Equipment Operator — 11y, 12y, 13y

Electrical Trades

Electrical Trades: Cathodic Protection Technician** (2 Levels); Code Update; Electric Motor Systems Technician*; Electrical Systems Principles; Electrician*; Heavy Duty Electrical & Electronics; Master Electrician; Power System Electrician*; Pre-Employment Electrician — 14y, O1y

Instrument Technician*, Powerline Technician* and Wind Turbine Technician: Pre-Employment — 14y

WHICH POST-SECONDARY INSTITUTION SHOULD I ATTEND?

The content of this section is based on information provided by schools prior to printing *Time to Choose* in the summer of 2016. Please confirm program information with the school before making your educational plans.

Making my choice

Now that you've figured out what you want to study and where your program is offered, it's time to choose your school. This section lists all the post-secondary institutions funded by or offering degree programs approved by the provincial government. You'll find contact information, application dates, campus locations and more.

If only one institution offers the program you want, you can take your entire program at that institution. Or you may complete part of your program through another institution if

- appropriate transfer of your coursework is available at other post-secondary institutions (see Transfer Programs, page 13)
- appropriate eCampusAlberta courses are available online (see ecampusalberta.ca)

If more than one institution offers the program you want, think about these factors:

- **location:** Can you afford to move away? Do you want to experience a small town? A big city?
- **size:** Do you want the variety offered at a large institution? Or the one-on-one contact at a small one? What about class sizes?
- **type of institution:** Faith-based? Liberal arts? Research?
- **reputation:** Is the school known for the program you want? Will it be valued by employers?
- **costs:** Have you added up tuition fees, books, accommodation, transportation and so on? (See Estimating Post-Secondary Costs, page 45.)
- **social and leisure activities:** What about student clubs, theatre groups or volunteer opportunities?
- **student services and facilities:** Housing? Meal plans? Fitness? (See the Features Chart, page 56.)

Most post-secondary institutions have student advisors who help current and prospective students

- make informed decisions when selecting programs and courses
- interpret academic regulations and procedures
- understand students' rights and responsibilities
- fill out applications for financial assistance
- find other resources

© Government of Alberta

For advisor contact information, call the registrar's office at the institution.

To learn more about the post-secondary institutions you're interested in

- request information brochures or calendars from the institution(s)
- visit the institution websites
- talk to people you know who have attended the institution(s)
- visit the institution(s) yourself

Many post-secondary institutions have open houses, information sessions or "student for a day" opportunities. This is a great opportunity to have a look around, experience the learning environment, ask about program content and find out what student life is like. Many institutions also sponsor or participate in career fairs where you can meet with faculty, industry representatives and current students.

Estimating post-secondary costs

The following chart outlines **average** costs for your first year of a certificate, diploma or bachelor's degree program based on figures from June 2013. Costs can vary among institutions and for different programs, so **always confirm tuition and fees with the school you want to attend**. Many have tuition fee calculators on their websites.

	Tuition	Mandatory Fees
Publicly funded institutions		
Universities	$5,402	$1,102
Polytechnic institutions	$5,044	$816
Colleges	$3,881	$746
Independent university colleges	$9,225	$650
Other education and training options		
Apprenticeship Programs	$35 apprenticeship registration fee, plus the following costs: 1. On-the-job costs (tools, protective equipment, etc.) 2. Tuition: $96.50/week 3. Materials: $66 Apprentices also pay for books, parking, student association fees, facility fees and consumables during their technical training. Contact your local Apprenticeship and Industry Training office to learn more.	

Adapted from estimated tuition fees provided at **advancededucation.alberta.ca/planning/costs.aspx. Click on How much can I expect to spend on tuitions, books, fees and supplies?*

Main campus locations

The map below shows the main campus locations of post-secondary institutions funded by or offering degree programs approved by the provincial government. Check institution websites for additional campus locations.

HOW DO I GET THERE FROM HERE?

Paying for my post-secondary education

Most post-secondary students pay for their education through a combination of strategies:

- applying for awards such as grants, bursaries and scholarships
- applying for student aid
- receiving financial assistance from parents or other family members
- reducing expenses by living with parents
- savings from jobs or investments
- studying full time during the school year and working during summer breaks or part time throughout the year
- studying part time and working full time
- taking co-operative education, apprenticeship or applied degree programs that include periods of paid employment

Use the Alberta Learning Information Service (ALIS) website to find information about loans, grants, bursaries, financial planning and more. Visit **alis.alberta.ca/mytuition**.

Go to **studentaid.alberta.ca** for information about student loans, grants, scholarships and awards. You may be eligible for awards even if you don't have the highest marks in your class. You can search for hundreds of scholarships, grants and awards at **studentaid.alberta.ca/scholarships**, or you can visit your high school guidance or student services office, and the awards office at the post-secondary institution you plan to attend.

Bursaries

Bursaries are non-repayable awards given by universities, colleges and other sources to students who demonstrate financial need.

Grants

Grants are based on financial need or for those who require special financial assistance. Grants do not have to be repaid. You can learn more about the variety of grants offered at **studentaid.alberta.ca**.

Government of Alberta

Scholarships

Scholarships are cash awards given to students selected primarily on the basis of academic excellence. Some scholarships also recognize extracurricular activities, athletic ability or other achievements. Scholarships may be provided by the government, educational institutions, service organizations or the private sector.

You and your family are probably connected in one way or another to a number of clubs, organizations, societies, foundations, associations, unions and companies that may offer awards for post-secondary students. For example, a large employer may offer post-secondary bursaries for children of employees or for employees themselves. This type of award may depend on high school final marks, post-secondary course load or achievement of a specified minimum grade point average.

Find out what you might be eligible for by talking to the employer and your family members, and by checking award listings.

Learn more about scholarships at **studentaid.alberta.ca/scholarships**.

Government-sponsored student aid

Government-sponsored student aid includes student loans, which you must repay after studies are completed, and grants, which you do not repay.

For student aid information

- contact the Student Aid Alberta Service Centre at 1-855-606-2096 toll-free
- contact your high school student services office
- contact the student awards office at any post-secondary institution in Alberta
- visit the Student Aid Alberta website at **studentaid.alberta.ca**

Apply for student aid early. That way you'll know if your application is successful before school starts. For example, if your program starts in September, it's a good idea to submit your student funding application by early July.

Applications are processed throughout the year, but Student Aid Alberta must receive your application at least 30 days before your current year's program ends in order to process.

If you're an Alberta resident attending full-time post-secondary studies on or after August 1, 2016, you may be eligible to apply online for student aid at studentaid.alberta.ca/applying-for-funding.

© Government of Alberta

The ALIS website has online student services that allow you to

- **review admission requirements for Alberta post-secondary schools**
- **request your high school transcripts**
- **find your Alberta Student Number (ASN)**
- **apply for student aid**

Go to alis.alberta.ca/onlinestudentservices.

Applying for admission

The application procedures at most institutions are integrated with ApplyAlberta, an online post-secondary application and transcript transfer system. You can use this system to apply to undergraduate programs at one or more of Alberta's public colleges, universities and polytechnic institutes. While you are completing your ApplyAlberta application, you will authorize the transfer of your Alberta high school transcript at no cost to you.

For more information, visit **applyalberta.ca**. Check the list of participating institutions to make sure the one you want to attend is using ApplyAlberta. If not, apply directly through the institution's website.

Ordering Alberta transcripts of high school achievement

If you're not using ApplyAlberta, you can order Alberta high school transcripts online at **mypass.alberta.ca**. There is a non-refundable fee for each transcript.

For more information, visit **education.alberta.ca/transcripts**.

WHAT RESOURCES ARE AVAILABLE?

Admissions

ApplyAlberta

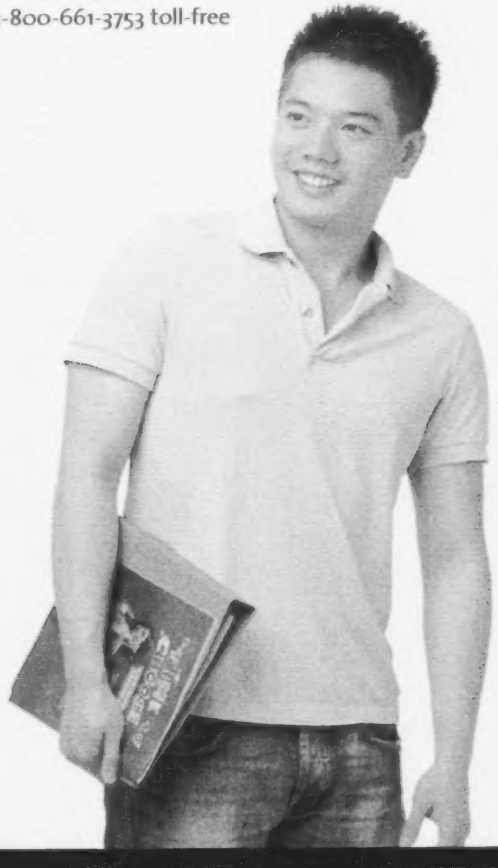
applyalberta.ca
This secure online application system makes it simple to apply to one or more participating post-secondary institutions and to request Alberta high school and post-secondary transcripts.

Alberta Career Information Hotline

alis.alberta.ca/hotline
The Alberta Career Information Hotline is a career consulting and referral service. Hotline staff can answer your questions about

- educational options
- career planning
- occupations
- job search skills

Phone: 780-422-4266
or 1-800-661-3753 toll-free



Alberta Learning Information Service (ALIS) website

alis.alberta.ca
ALIS is Alberta's online source for career, education and employment information. Here's what you'll find on the website:

ALIS Articles—easy-to-read articles on career, learning and employment topics

CAREERinsite—interactive career planning tools and information

Education Financing—details on student funding and links to information on hundreds of potential scholarships and awards

eProducts and Services—access to career, learning and employment publications, which are free and downloadable

High School Transcripts—information and links to Canadian high school transcript offices

Job Search Websites—links to job boards to give you an idea of the qualifications employers are looking for

OCCinfo—occupation descriptions, education information, certification requirements and wage and salary information for more than 550 occupations

Occupational Videos—videos about different occupations

Alberta Works Centres

alis.alberta.ca/awc
Alberta Works Centres are located across the province and provide information on education programs and funding, occupations, career options and finding work. To locate an office near you, call the Alberta Career Information Hotline or visit the ALIS website.

Money 101 helps you set personal goals, figure out what your education will cost and identify ways to pay for it. Find information on debt and student loans, budgeting, banking, avoiding credit card pitfalls and stretching your dollars. View or download your copy at **alis.alberta.ca/publications**.

Study abroad

ALIS Articles

alis.alberta.ca/tips
For information to help you on your way, check out the article Studying Abroad: Getting Ready to Go. The Working Abroad article offers pointers about finding a job outside the country.

Canadian Information Centre for International Credentials

cicic.ca/2/home.canada
Individual tab, then click on Study Internationally.

Opportunities to study abroad

advancededucation.alberta.ca/studyabroad
Alberta Advanced Education offers Alberta students a variety of international work and study experiences:

The Alberta-Smithsonian Internship Program
Each year up to 10 post-secondary students receive support for semester-long internships with scholars, scientists and experts in science, history and culture at one of the Smithsonian Institute's 25 museums and research facilities in Washington, D.C., or other Smithsonian sites around the world.

The Washington Center–Alberta Internship Partnership
This partnership funds up to 25 Alberta post-secondary students per year as they intern for a semester at prominent organizations in government, business and non-profit sectors in Washington, D.C.

Campus Alberta Grant for International Learning
The Alberta government gives up to $750 per year to about 400 students who study abroad. These students participate in group-based, faculty-led programs organized by Alberta post-secondary institutions.

China Government Scholarships
This annual program offers five full scholarships, including tuition, housing and travel costs, and 10 partial scholarships, covering tuition only, to Alberta students who wish to study any discipline in Mandarin at a Chinese university.

Summer School in the Czech Republic
This annual program offers two scholarships (including tuition, house and field trip costs) to Alberta students who wish to learn about Slavic culture and language at a university in the Czech Republic during the summer.

Transcripts

High School Transcripts

education.alberta.ca/transcripts
Visit this website to order high school transcripts online from Alberta Education. See page 60 for additional information and other ordering options.

Transfer credit

Transfer Alberta

transferalberta.ca
The Transfer Alberta website provides access to information for many learner pathways in Alberta post-secondary, including transfer and high school upgrading. Transfer Alberta is the official source of transfer information in Alberta. It lists more than 80,000 transfer agreements and provides information about admissions, academic upgrading, dual credit and more. See page 13 for more information.

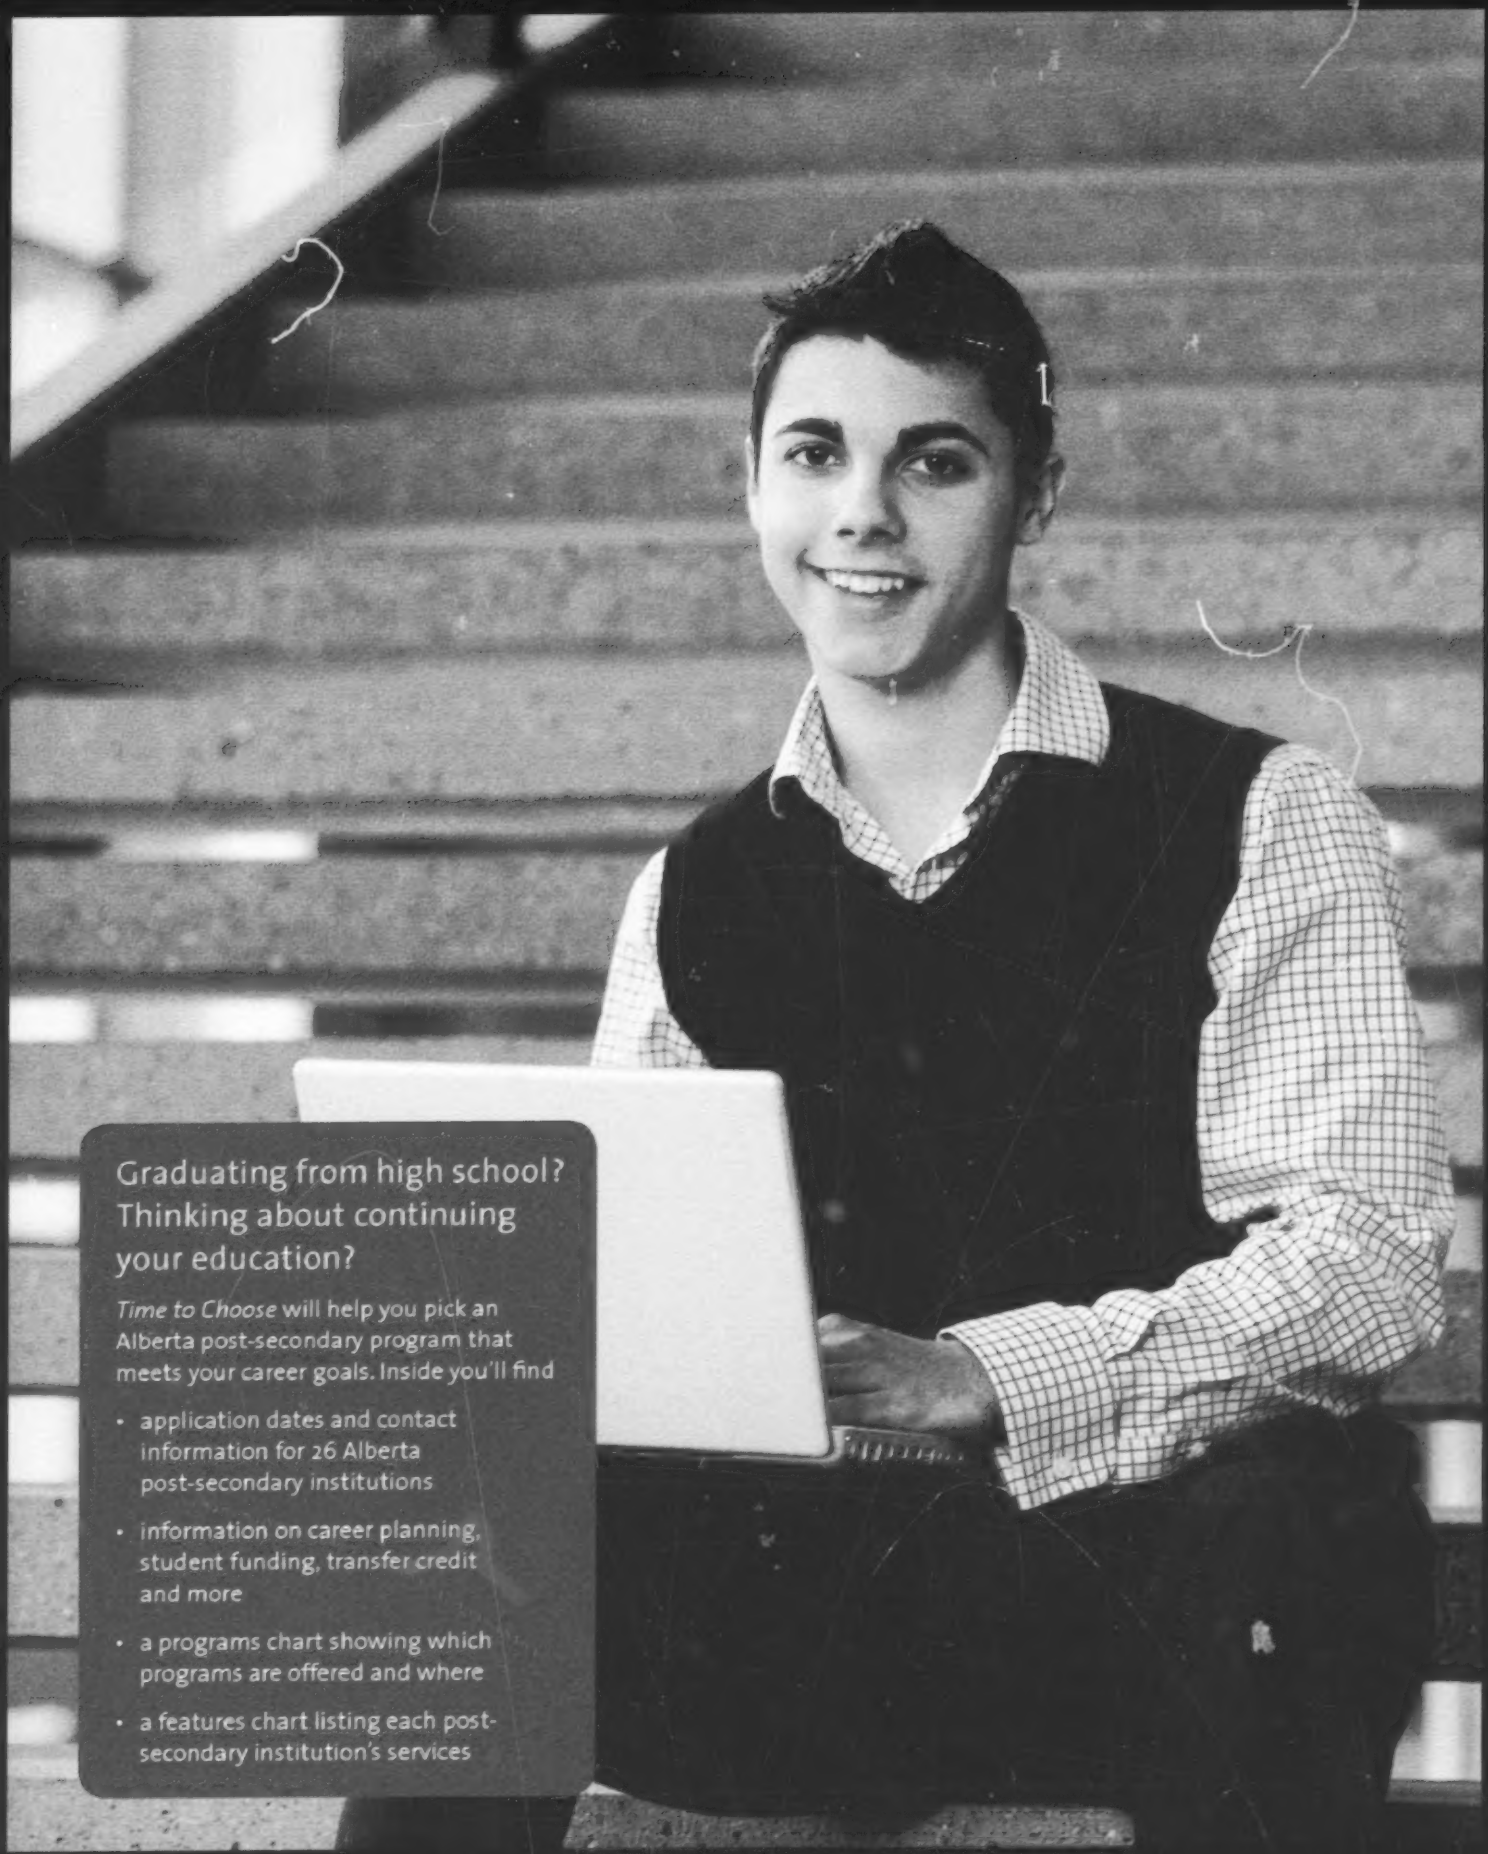
CAREER PLANNING • EDUCATION • JOBS

**Wondering where to take your career? How to find a job?
Is continuing your education the next step?
Find the answers on ALIS.**

Make the Most of Your Future

Alberta
Government



Graduating from high school? Thinking about continuing your education?

Time to Choose will help you pick an Alberta post-secondary program that meets your career goals. Inside you'll find

- application dates and contact information for 26 Alberta post-secondary institutions
- information on career planning, student funding, transfer credit and more
- a programs chart showing which programs are offered and where
- a features chart listing each post-secondary institution's services
